ReAssignCOMPortNumb.exe	23/11/2010 4:08 PM	Application	433 KB

2. Change a properties setting for dp-chooser.exe by right click on the file, select properties -> compatibility and tick ☐ Run this program as an administrator  
If you don't do it, you may have issue as shown below.

3. Once finish, please unplug and plug back the USB cable of your cutter and wait for the driver to finish installing.
4. Run this program to set the cutter's Port and you need to remember it for the cutting program setup as shown below. The top USB Serial Port(COM#) is current port and the bottom port is the new port. The Port COM number need to be 1-4 for Artcut 2009 & Sign Blazer software. For Flexi-Starter 10, it can be any numbers.
